How to guides / explainer posts - 59.7% of internet users are researching how to do things

Content that gets straight to the point with a clear and concise TOV

Localised in Dutch

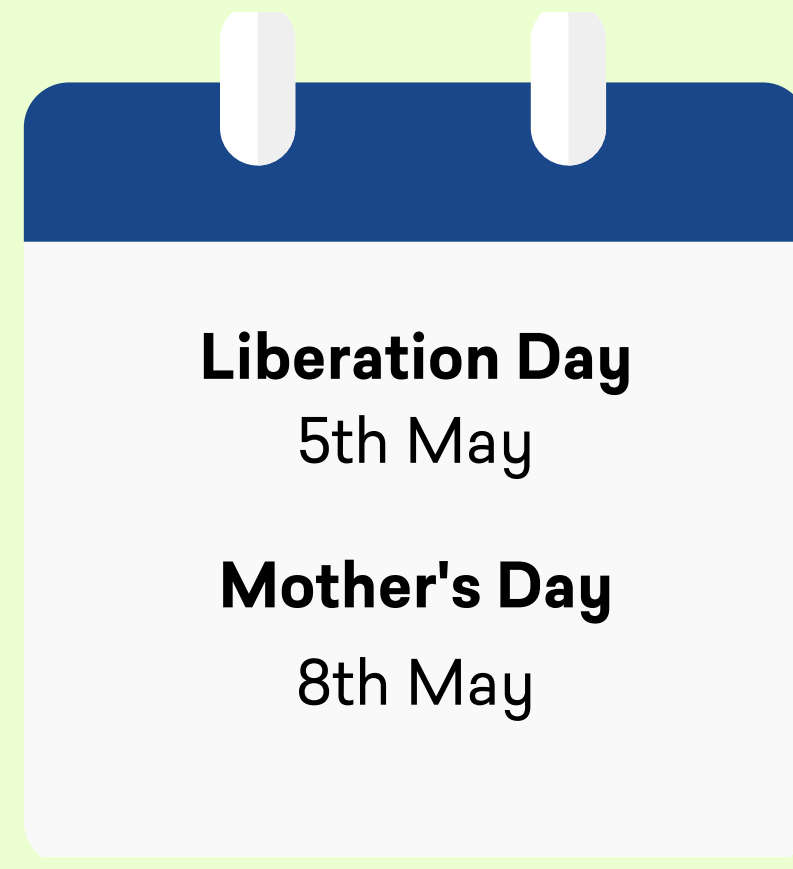

SOCIAL MEDIA USAGE

15.6 million social media users in total

KEY MARKETING DATES IN THE NETHERLANDS

Here are some important dates that you can make use of when marketing in the Netherlands, especially if you're creating a content strategy. You can also check out our marketing calendar for more international dates and holidays.

CONCLUSIONS

- The Netherlands has a high percentage of internet users and social media users.
- The most used devices are desktop and mobile, so it is important to make sure that your site is mobile friendly.
- A typical Dutch user has concerns about privacy and how their data is used. They are likely to decline cookies which you need to keep in mind when analysing site traffic.
- Your main focus for SEO and PPC efforts should be Google, as they hold the majority of the search engine market share.
- The social media platforms with the highest number of users are YouTube, LinkedIn, Facebook, and Instagram. These platforms should be your initial focus for any social efforts
- The high number of YouTube users also shows the popularity in video content, which is a result of the high internet speed.
- For written content such as blog posts, keep a clear and concise tone of voice. Make sure your content gets straight to the point.
- There is a high proficiency in English in the Netherlands; however, most users are searching in Dutch. So, you need to localise your content.
